

INNOVATIVE SOLUTIONS INITIATIVE (ISI)

Unified Care. Smarter Tools. Better Lives.

Patent-Pending Platform for Connected, Intelligent Care Delivery

PRESENTED TO

Bryte Payment Solutions

PRESENTED BY

Ignite Collective Agency

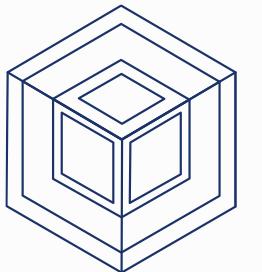

MISSION

To transform how care is delivered and coordinated across the globe — by building an intelligent, secure, and connected platform that unifies healthcare, education, and social services. ISI empowers individuals, families, and professionals with real-time insights, collaborative tools, and personalized pathways for better health and well-being.

VISION

To create a future where every individual, regardless of ability, age, or background, receives intelligent, connected, and compassionate care through a unified system that empowers people and professionals to collaborate seamlessly across health, education, and human services.

The Problem

Care is fragmented.

- Data lives in silos
- Transitions break down
- Manual processes overwhelm
- Loss of productivity
- Lack of ownership of their care data

The result?

Lost time. Lost outcomes.

And a system too complex for the people it's meant to serve.

ORIA

What Are We Training Her to Do?

Training Inputs:

- IEPs, therapy notes, medical records
- Behavior and therapy response data
- EHR integration (FHIR/HL7)
- Academic progress and assessments

What is ORIA Producing?

Key Deliverables:

- Document summaries and recommendations
- Behavior and health anomaly detection
- Personalized care plan suggestions
- Automated client intake assessments

Provider Value:

- Faster onboarding
- Fewer documentation errors
- Real-time decision support

MyEMR

Patient-Facing Platform

Model Highlights:

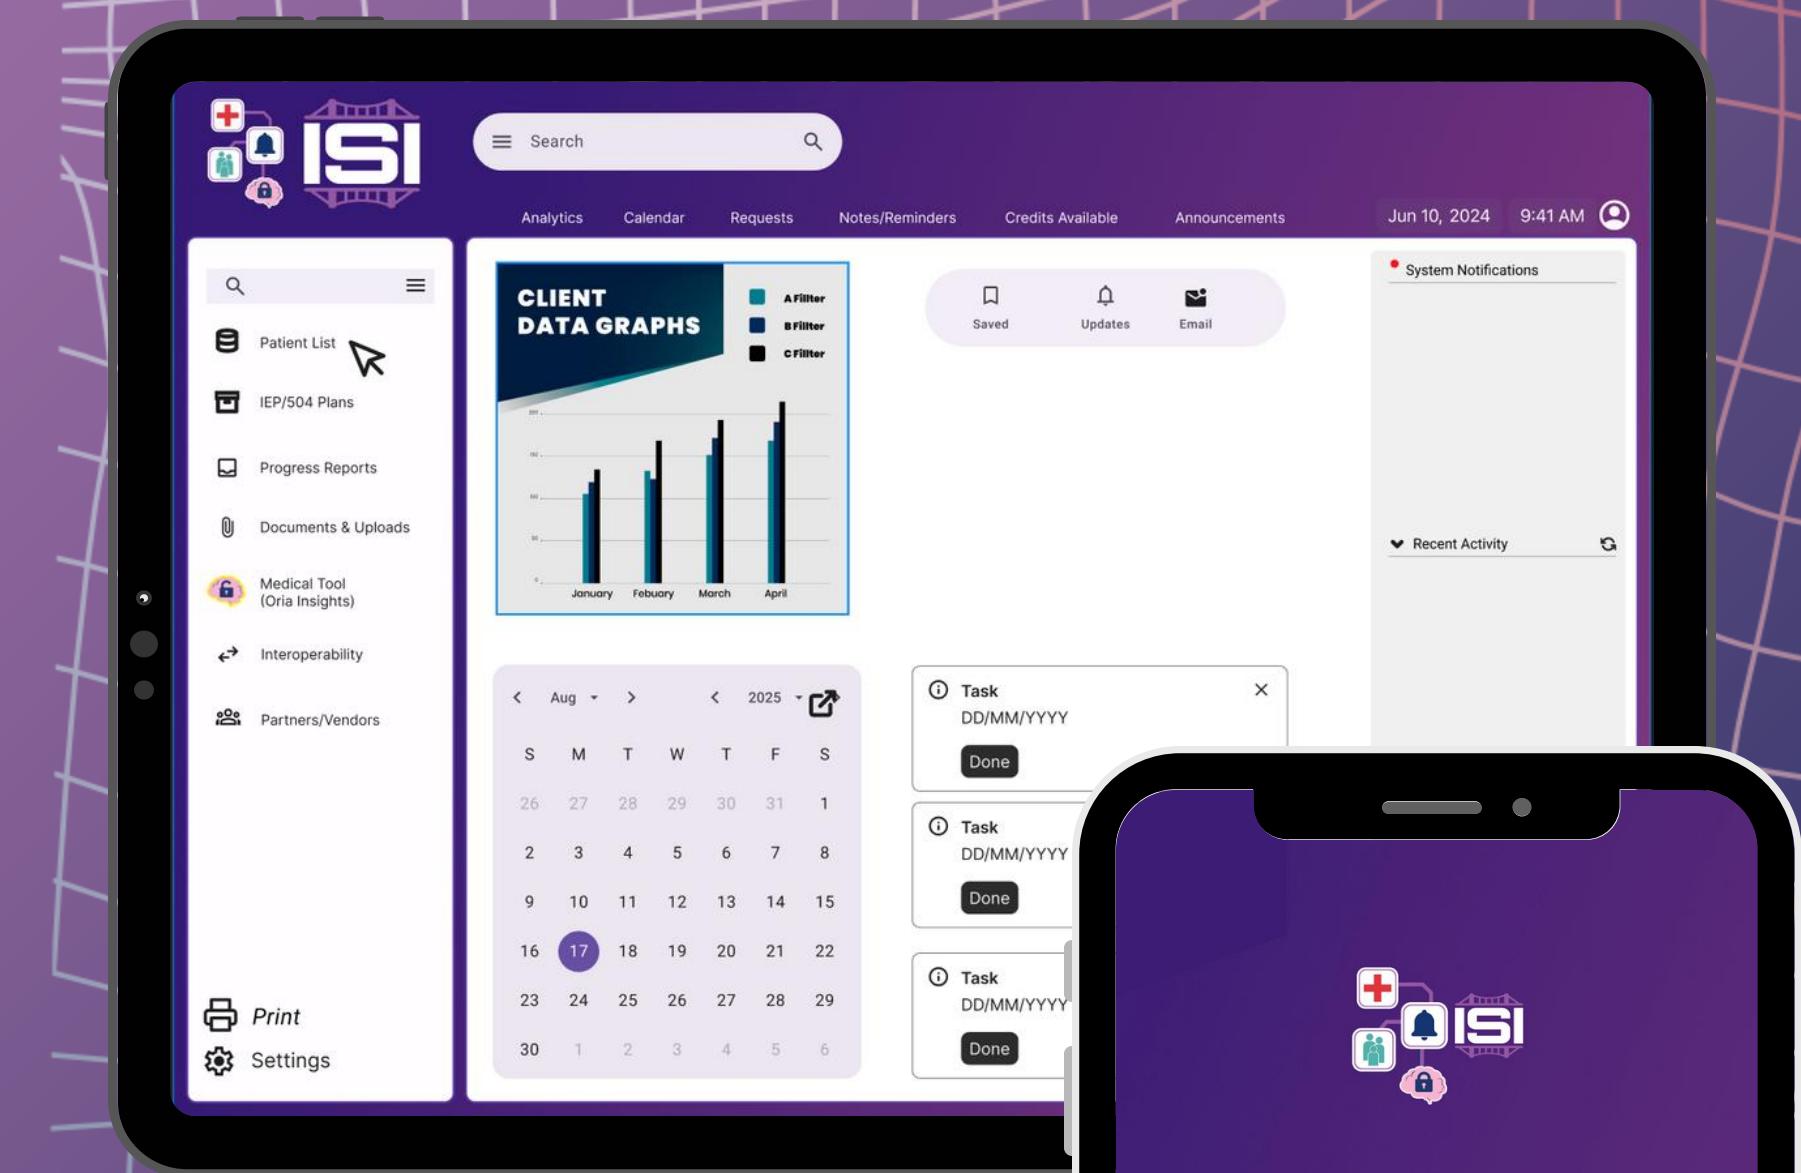

- Patient-controlled access
- Fully HIPAA, FERPA, and GDPR compliant
- Accessible via mobile/web

Core Features:

- Role-based permissions
- Consent-based data sharing
- Emergency access protocol
- Integration with EHR and school systems

Interoperability Protocols:

- FHIR API (Epic): Enables real-time, secure data exchange
- OAuth 2.0: Secure patient authentication
- Bulk Data Support: Scalable data access for large records
- CDS Hooks: Integrates clinical decision support tools

ISI

Growth Potential

Over the past five years, ISI has demonstrated a scalable growth model, with projected net income rising from \$ 282,000 to nearly \$10 million, representing an over 30-fold increase. This highlights its strong profitability and an exponential market adoption trajectory.

Future Implications ISI's Strategic Impact

- Accelerates Clinical Trials: Matches patients to pharmaceutical studies faster, improving trial efficiency and population diversity.
- Reduces Healthcare Costs: Automates outcome tracking for Medicaid and private insurers, enabling data-driven funding decisions.
- Improves National Readiness: Identifies behavioral health trends early, guiding public health interventions and resource allocation.

Financial Snapshot & Capital Requirement

1

Development Budget: \$165,000

Data Cost, Platform, Development

2

Operational Budget: \$326, 000

Labor, HIPAA/FERPA, AWS

3

5 Year ROI at 3.5%: \$937,440.00

Card Processing Fees

Over 213,000 U.S. physician offices serve millions—offering massive opportunity to empower private practices at scale

ISI UI/UX

Dashboard

The login screen features a large "Log In" header at the top. Below it are two input fields: "Email" and "Password". The "Email" field includes a placeholder icon and a search icon. The "Password" field includes a placeholder icon, a visibility toggle icon, and a "Forgot Password?" link. A "Remember me" checkbox is located next to the "Email" field. A prominent yellow "Login" button is centered below the inputs. At the bottom right is a "Questions?" button with a speech bubble icon.

The dashboard screen shows the ISI logo at the top left. A navigation bar with links for "Analytics", "Calendar", "Requests", "Notes/Reminders", "Credits Available", and "Announcements" is positioned above the main content area. The date "Jun 10, 2024" and time "9:41 AM" are displayed on the right. On the left, a sidebar lists "Patient List", "IEP/504 Plans", "Progress Reports", "Documents & Uploads", "Medical Tool (Oria Insights)", "Interoperability", and "Partners/Vendors". A "Print" and "Settings" option are at the bottom of the sidebar. The central area contains a "CLIENT DATA GRAPHS" section with a bar chart showing data for January, February, March, and April across three filters (A, B, C). Below this is a calendar for August 2025, with the 17th highlighted. To the right, there are three "Task" notifications for "DD/MM/YYYY" with "Done" buttons. A "Recent Activity" section is partially visible on the far right. A "Chat With Us" button with a question mark icon is located at the bottom right.

Competitive Advantage

What Makes ISI Different

- AI-generated IEP and care recommendations
- True interoperability across EHRs and SIS
- Secure provider handoffs via consent-controlled permissions
- Patent-pending system built for long-term scalability
- Inclusive, mobile-first UX design

Let's create better care systems— together.

A credit card processor to support HIPAA/PCI-compliant transactions

Integration into B2C and B2B subscription models
Long-term partnership for enterprise billing at scale
